FREQUENTLY ASKED QUESTIONS ABOUT EARTHQUAKES

0) _____
Rocks break and move in the earth. Energy is released, and that's what makes the ground shake.

1) _____
The slow deformation of "tectonic plates". The rocks can break suddenly, releasing the stored energy as an earthquake.

2) _____
The ground shaking may destroy buildings and hurt people.

3) _____
No. People wrongly believe that suddenly a hole appears in the ground. This is only Hollywood's version of earthquakes.

4) _____
Actually, all over the world; however, the so-called "Ring of Fire", which is around the Pacific Ocean, is probably one of the most active areas in the world.

5) _____
Not really, and we certainly can't tell their exact date, time and location in advance.

6) _____
Yes. As a result of some human activities such as mining or underground nuclear explosions, there can be small ones.

7) _____
Some international websites have lists of earthquakes of magnitude 5.0 and greater, and most countries have their own forums with information on local earthquakes.

8) _____
No, they happen at more or less the same rate every year.

'IMPOSSIBLE' EXAM QUESTION LEAVES CHINESE STUDENTS PUZZLED

Primary school students at a school in China had this question on a test: "If a ship has 26 sheep and 10 goats on board, how old is the ship's captain?"

The question caused a heated debate on Chinese social media. "This question makes no logical sense at all. Does the teacher even know the answer?" Some, however, defended the school, saying, "This question forces children to explain their thinking and gives them space to be creative. We should have more questions like this."

The local Education Department says the test was intended to "examine the ability to think independently." The traditional Chinese method of education heavily emphasises note-taking and repetition, which critics say doesn't encourage creative thinking.

And, of course, there's always that one person who has the right answer. "The total weight of 26 sheep and 10 goats is 7,700kg, based on the average weight of each animal. In China, if you're driving a ship that has more than 5,000kg of cargo, you need to have had a boat license for five years. The minimum age for getting a boat license is 23, so he's at least 28."

BLUE MONDAY

Feeling miserable this morning? That is because January 15 is supposedly the most depressing day this year. A combination of three reasons makes the third Monday of the year the most miserable. Understanding that Christmas really is over, the realisation of all the holiday expenses and the fact that most of us are back at work all play a part. First invented in Britain, *Blue Monday* is especially sad in the northern half of the world, where it's also deep, dark midwinter.

It was in 2005 that Cliff Arnall, a university lecturer from Wales, dreamt up his gloomy calculation using the above three main factors to find the date of the most depressing day in the year. He also took into account things like the weather, the period since we've broken our New Year's resolutions and our general motivational level.

However, there is hope, say psychologists, as Blue Monday was really all a marketing trick. January in the UK is peak holiday booking time and the original research was paid for by a travel agent who wanted to persuade people to cheer up by heading to the beach. Preferably through them.

While there is no scientific evidence of Blue Monday on the third Monday of January – or any other Monday in a year – research shows us that our mood is significantly better on Fridays and over the weekend in general. This is generally because we get more sleep and "me time" to spoil ourselves.

Dr Burke, a psychologist, says that "since Blue Monday is a trick that may affect our thinking and emotions so much, we should turn it into Happy Monday. Instead of searching for all that is going badly on the day, think of all the good things that happen around you – that woman who held the bus door to prevent it from closing, the old lady who smiled at you for no reason or the little boy who gave you a big hug."

(www.news.com.au)

0) *The most depressing day of the year is called Blue Monday.*

0)	***A***	

22) People feel sad on this day because they are worried about the cost of their summer holiday.

23) The phrase *Blue Monday* originally comes from Britain.

24) More and more people are refusing to work on Blue Monday.

25) Mr Arnall's calculation has nothing to do with the weather.

26) A holiday company managed to make a lot of money on Blue Monday.

27) Among Britons, seaside resorts are very popular in January.

28) There is scientific evidence that Mondays are sadder than Fridays.

29) According to Dr Burke, it depends on your attitude whether this day is sad.

Task 2

You have read the following post on an internet forum called Career Choice:

> Hi everyone. I believe it's time for me to open up a bit more to the community. And I'll do that by telling you all about what I plan to do once I get into college and sharing my career problem with you.
>
> I want to get an English Major and teach English literature to elementary school children across the USA. All my life I have heard kids complain that they "hate" reading. Those are the kids I want to reach out to. I want to make America literate again! (Pretty awesome slogan, eh?)
>
> The only problem is that all my family and friends say that the last career I should choose is a teacher's. They say that a teacher should be hardworking and patient whereas I'm lazy and moody. Do you agree that these are the most important personality traits of a teacher? As simple as that? I'd like to know what you think.
