TAKE CONTROL OF YOUR PHONE

Here is a list of simple changes that can help you become a mindful user of your device.

0) _____

Get rid of unnecessary banners, red dots and vibrations that take you back into apps you don't need to be in. Allow only messaging apps to send you notifications, when real people want your attention.

1) _____

Colourful icons give our brains shiny rewards every time we unlock. Keep colours for when you really need them.

2) _____

Leave your phone in another room for the night. This way, you can wake up without finding yourself checking your phone before you even get out of bed.

3) _____

Placing your phone in a drawer or a place where you can't see it can help reduce the anxiety of wanting to check it. Ideal solution for homework time.

4) _____

It's easy to misinterpret written messages. Recording a quick voice message instead is safer – and faster – than typing out each letter.

5) _____

These apps tend to use up most of our time. Train yourself to use them from your computer only. Or even better: make efforts to interact with people in person.

6) _____

Meditation and monitoring apps will give you back the time that other apps have stolen. Through short, daily exercise, they help you use your phone in a healthy way.

RESEARCHERS PAY PEOPLE TO STAY IN BED

Getting paid $23,000 to stay in bed for two months sounds pretty good. That's what a medical research team is offering to 24 volunteers.

Researchers are looking for volunteers to help them study the effects of weightlessness on the human body by spending 60 days lying down. Lying in bed isn't exactly the same as being weightless, but it affects the body in a similar way.

When astronauts spend a long time in an environment with no gravity, their bodies are affected in many ways; for example, their hearts don't pump as hard, their muscles become weaker because they no longer have to work against gravity, and their bones may break more easily. There may also be changes in their immune systems and sleep habits.

The goal of the present study, which will take 88 days altogether, is to measure the effects of weightlessness, and also to find ways to prevent problems. During the first two weeks, the volunteers' levels of health and fitness will be measured. Then, they will spend 60 days lying in bed with their heads slightly lower than their bodies. They will have to do everything while lying down, including eating, brushing their teeth, and going to the bathroom. The rule is that they must have at least one shoulder touching the bed at all times. Half of the volunteers in the study will be taking special food supplements to see if they help reduce the health problems caused by weightlessness. The last two weeks of the study will be spent taking more measurements and trying to build up their strength again.

Volunteers must be men between the ages of 20 and 45 who are in perfect health and physically active. They must be non-smokers and have no allergies.

Task 2

You received the following email from your Finnish friend, Heikki:

Hey there,

You know how much I love my sister Liisa, who, being 12 years older than me, has always been like a second mother to me. Since I started high school and moved from our village to Tampere, I've been living with her and her family: her husband and twin baby daughters. This has been the happiest time of my life, but it's nearly over as I'm off to uni in September.

Luckily her 30th birthday is next month when I'm still here and there will be a big family celebration, our parents will come and also several close and distant relatives from all over the country. Of course I always give Liisa a present for her birthday but this time I thought it should be something really special, some sort of thank you present for the past four years.

My idea was that together with some friends from school we would learn an all-boy show-dance in Twist and Pulse style (have you seen them on Britain's Got Talent? they are amazing!?), and perform it in front of the guests at the birthday party. My friends were also enthusiastic, and we have even started putting together the sound track and rehearsing using a teaching video. My mother, however, wasn't very keen when she heard about the idea. On the contrary in fact, she said such a performance would be in very bad taste and might even shock some of the older aunts and uncles. Why not buy her, she suggested, a necklace or a pair of earrings? Earrings! I'm sure Liisa would know immediately that it can't have been my own choice of a present and I want something that is really ME. What do you think?

Write a letter of 100-120 words to Heikki in which you tell him

- whether you like his idea for a present,
- what you think of giving a performance or buying something as a present in general,
- why you think his mother is against the idea,
- what he should do/ give his sister.
